Baking with Westmark

Westmark to extend their range of baking products range with cutters!

At last year's Ambiente, the topic of 'Baking with Westmark' was presented as a complete module for the first time with an extensive range of articles, from baking tins in various qualities to decorating pens and modelling sets. As a result of its great success, this product range has now been extended by a concept featuring the most popular biscuit cutters.

These stainless steel cutters are available relating to different special themes for many occasions, in different packaging forms and with suitable presentation aids.

For example, a compact counter rotating stand and practical stand display – also rotatable and on castors - are available.

The place cards are particularly attractive and promote sales. For every cutter motif we offer a coloured place card which depicts the article with article number, EAN and price group recommendation as well as lovingly-decorated baking results. As a result, re-stocking of the display is simplified for the trader, and the end consumer is provided with one or the other creative stimulus.

Baking represents trend, style, creativity, fun, and cosiness...and Westmark consistently pursues these themes – as will now become clear.

Westmark GmbH

Westmark is a medium-sized company based in Elspe in the Sauerland, in the south-western part of the German state of North Rhine Westphalia. Westmark offers a large range of kitchen aids and useful household goods for kitchens and caterers. Its products are distributed by specialist outlets as well as more broadly.

A large proportion of the range is produced within the company itself; which is just what you'd expect from products „Made in Germany“. The company boasts more than 50 years of experience in the plastics and metal manufacturing sector.
