Press information

Presentation series and kitchen aids

Westmark provides presentation items and kitchen aids in two design lines.

Production: Made in Germany

Gallant series

The presentation items of the 'Gallant' series are produced in heat-resistant polyamide – completely MADE IN GERMANY – in the Westmark works in Lennestadt-Elspe. The two-colour comfort, soft-touch grip combines attractive looks and the desired functionality. In the meantime, this series has been supplemented by 20 kitchen aids covering the most popular accessories ranging from potato peelers via pastry brushes and apple corers right up to pizza cutters.

Further kitchen aids – for example a potato masher or a tomato/kiwi peeler are to follow over the course of the year.

This series is an attractive 'eye-catcher' on retail shelves thanks to its wide product range and clear and informative packaging concepts.

Gentle series

In order to provide differentiation potential, the handles of the Gentle series will be made from a material produced in our works in Lennestadt-Elspe, presenting themselves completely in black. The difference to the Gallant series can also be found in the metal functional parts on the kitchen aids. Available in a similar range of products - the Gentle series thus starts with low retail selling prices.

Westmark GmbH

Westmark is a medium-sized company based in Elspe in the Sauerland, in the south-western part of the German state of North Rhine Westphalia. Westmark offers a large range of kitchen aids and useful household goods for kitchens and caterers. Its products are distributed by specialist outlets as well as more broadly.

A large proportion of the range is produced within the company itself; which is just what you'd expect from products „Made in Germany“. The company boasts more than 50 years of experience in the plastics and metal manufacturing sector.
